Computer technology in carpet weaving

March 2, 2014 16:35

Agency "Jahon" - February 14-28 in Tashkent will host the training in the use of special software Galaincha for designers, specialists in the design of handmade carpets. According to the press office of the Chamber of Commerce of Uzbekistan.

Uzbekistan Masters patterns will be trained under the guidance of coaches - specialists in working with this program Puzha Shrestha and Padma Tuladhar, who are invited to Tashkent representative of the German Society for International Cooperation.

This project aims to improve the development process original and high quality woven products made in our country. After all, any carpet is not just a beautiful design - it is also a tradition, symbolism, feature perception of the world in different regions of Uzbekistan, meaning invested in ornament. More Marco Polo admired rugs from Central Asia - he said that the most delicate and beautiful rugs are woven here.
